🔴 PAID APIS

Adverse Media Screening — ComplyAdvantage

- **Purpose:** Screen individuals and companies for adverse media, sanctions and PEP risk.
- **Provider:** ComplyAdvantage
- **Integration:** REST API.
- **Method:** POST.
- **Endpoint:** https://api.complyadvantage.com/searches
- **Authentication:** Authorization: Token YOUR_API_KEY
- **Input:** Name/search term, with optional DOB, country, entity type and filters.
- **Data:** Adverse media, sanctions, PEP matches, aliases, sources and match details.
- **Sandbox:** Available for testing.
- **Production / Usage Pricing: Paid** — Commercial pricing is based on the selected solution, screening volume and plan; no fixed public per-call price is listed.
- **Docs:** https://docs.complyadvantage.com/
- **Other Providers:** LexisNexis, Dow Jones, Moody's, CrimeCheck, Profiden, OpenSanctions.

RERA Verification — Profiden

- **Purpose:** Verify whether a real-estate project or agent is registered with the state RERA authority.
- **Provider:** Profiden
- **Integration and Method:** REST API / POST
- **Endpoint:** /v1/rera-verification
- **Authentication:** Organisation API key
- **Sandbox:** Yes — sandbox demo hits are available before production billing.
- **Environment:** Sandbox and Production use the same API contract.
- **Input:** RERA registration number + State
- **Data:** Registration type, project/agent name, promoter, valid-from date, valid-until date and registration status.
- **Source:** Authoritative state RERA source.
- **Consent:** Not required.
- **Billing / Pricing: Paid** — Per-successful-call / pay-as-you-go model; exact public API rate is not listed.
- **API Access:** API key issued through Profiden onboarding.

- **API Reference:** https://console.profiden.com/docs/rera-verification
- **Provider:** https://profiden.com/apis/rera-verification

Project Registration — Profiden

- **Purpose:** Verify whether a real-estate project is registered with the applicable state RERA authority.
- **Provider:** Profiden
- **Integration and Method:** REST API / POST
- **Endpoint:** /v1/rera-verification
- **Authentication:** Organisation API key
- **Sandbox:** Yes — sandbox demo hits available before production billing.
- **Environment:** Sandbox and Production use the same API contract.
- **Input:** RERA registration number + State
- **Data:** Registration type, project name, promoter, validity dates and registration status.
- **Source:** Authoritative state RERA source.
- **Consent:** Not required.
- **Billing / Pricing: Paid** — Pay-as-you-go / per-successful-call model; exact public API rate is not listed.
- **API Access:** Requires Profiden API access.
- **API Reference:** https://console.profiden.com/docs/rera-verification
- **Provider:** https://profiden.com/apis/rera-verification

Property Approvals — CMDA / DTCP

- **Provider:** Verified.RealEstate — LandLens
- **Purpose:** Verify CMDA/DTCP planning permissions, building approvals and layout approvals.
- **Integration:** REST API
- **Method:** POST
- **Endpoint:** https://verified.realestate/api/v1/tools/ppa_approval
- **Authentication:** Bearer API Key — Authorization: Bearer llk_YOUR_KEY
- **Sandbox:** No separate sandbox documented.
- **Input:** Property / survey / location details.
- **Data:** Planning permission approvals, building-plan approvals, layout approvals and related approval records.
- **Coverage:** Tamil Nadu — CMDA / DTCP and other planning authorities.

- **Production / Usage Pricing: Paid** — Credit-based pricing. The ppa_approval tool costs **1 credit per successful lookup**. LandLens credits start at **₹699** for a bundle; enterprise API access is available.
- **API Docs:** https://verified.realestate/landlens/mcp
- **Provider:** https://verified.realestate/
- **Other Providers:** CMDA, DTCP, Tamil Nadu Single Window Planning Permission Portal, Interlace India.

Property Litigation — eCourtsIndia

- **Provider:** eCourtsIndia
- **Purpose:** Search and verify litigation/court cases related to a property, owner or party.
- **Integration:** REST API.
- **Method:** GET / POST.
- **Base URL:** https://webapi.ecourtsindia.com/
- **Endpoint:** GET /api/partner/search — case search; GET /api/partner/case/{cnr} — case details.
- **Authentication:** Bearer API Token — Authorization: Bearer eci_live_…
- **Sandbox:** ₹200 free API credits on signup; no separate sandbox documented.
- **Input:** Party name, case number, CNR, court, case type, advocate, dates and other search filters.
- **Data:** Case status, parties, advocates, judges, hearings, orders, linked matters and court details.
- **Coverage:** Indian courts — Supreme Court, High Courts, District/Taluka Courts and supported tribunals.
- **Production / Usage Pricing: Paid** — Case Search costs ₹0.60 per request on Pay-As-You-Go or ₹0.20 on Enterprise. Case Detail costs ₹1.50 on Pay-As-You-Go or ₹0.50 on Enterprise.
- **API Docs:** https://ecourtsindia.com/api/docs
- **Pricing:** https://ecourtsindia.com/api/pricing
- **Other Providers:** Attestr, Vakeel360, Indian Kanoon.

Access Verification — LandLens

- **Provider:** Verified.RealEstate — LandLens
- **Purpose:** Verify property road access, road width and related access/buildability information.
- **API:** LandLens API.
- **Integration:** REST / HTTP API.
- **Method:** POST.

- **Endpoint:** https://verified.realestate/api/v1/tools/{name}
- **Access Verification Tools:** road_width, street_profile, survey_to_location, approval_search.
- **Authentication:** Bearer API Key — Authorization: Bearer llk_YOUR_KEY
- **Sandbox:** No separate sandbox documented.
- **Input:** Survey number, location / latitude & longitude and relevant revenue details.
- **Data:** Road width, property frontage/access, survey location and related planning/approval information.
- **Rate Limit:** 60 calls/minute and 3,000 calls/day per credential.
- **Production / Usage Pricing: Paid** — Credit-based pricing. For example, road_width costs **2 credits per answer**, while street_profile costs **1 credit**. Credits start at **₹699**.
- **API Documentation:** https://verified.realestate/landlens/mcp
- **OpenAPI:** https://verified.realestate/api/v1/openapi.json
- **API Tools:** GET /api/v1/tools and POST /api/v1/tools/{name}
- **Example Authentication/API:** LandLens documents Bearer-key authentication and POST requests over HTTPS.
- **Coverage:** Tamil Nadu.
- **Other Providers:** CMDA, DTCP, Tamil Nadu Single Window Planning Permission Portal.

PAN Verification — Protean / Income Tax Department

- **Purpose:** Verify PAN details against official records.
- **Integration:** PAN verification API/web service.
- **Sandbox:** Depends on onboarding.
- **Data:** PAN validity and matching details.
- **Production / Usage Pricing:** Paid — ₹12,000/year + GST (total ₹14,160) for software/API registration. Includes up to 750 free PAN verifications per day, with additional usage chargeable based on volume slabs.
- **Legal:** Official government-backed verification.
- **Docs:** Income Tax Department — PAN Verification

KYC / Identity Verification — HyperVerge

- **Purpose:** Verify customer identity using KYC and identity-verification APIs.
- **Integration:** REST API.
- **Sandbox:** Yes, staging environment available.
- **Authentication:** appId + appKey.

- **Production / Usage Pricing:** Paid — Usage-based pricing; exact per-verification cost depends on selected modules, volume tiers, and commercial plans.
- **Data:** Identity and verification results.
- **Docs:** HyperVerge API Documentation

Aadhaar eKYC — Setu

- **Purpose:** Aadhaar-based customer KYC verification.
- **Integration:** REST API.
- **Sandbox:** Yes.
- **Authentication:** x-client-id, x-client-secret, x-product-instance-id.
- **Production / Usage Pricing:** Paid — Production usage is commercially priced based on custom volume agreements via onboarding.
- **Data:** Name, DOB, gender, address and masked details.
- **Docs:** Setu Aadhaar eKYC Documentation

Document OCR / Verification — HyperVerge

- **Purpose:** Extract information from KYC documents using OCR.
- **Integration:** REST API.
- **Sandbox:** Provider onboarding/staging.
- **Authentication:** appId + appKey.
- **Production / Usage Pricing:** Paid — Usage-based pricing customized depending on OCR modules and transaction volume.
- **Data:** Extracted document fields and verification results.
- **Docs:** HyperVerge OCR API Documentation

Bank Account Verification — Setu

- **Purpose:** Verify bank account details.
- **Integration:** API-based verification.
- **Sandbox:** Yes.
- **Production / Usage Pricing:** Paid API — Per-verification transaction fee; exact commercial rates provided on onboarding.
- **Data:** Account/verification information.
- **Docs:** Setu Bank Account Verification Documentation

Mobile Verification — HyperVerge

- **Purpose:** Check mobile-number-associated accounts and identity signals.
- **Integration:** API-based.
- **Sandbox:** Provider onboarding.
- **Authentication:** appId + appKey + transactionId.
- **Production / Usage Pricing:** Paid — Includes a 1-month free sandbox trial under the Start plan; production pricing is customized based on volume.
- **Endpoint:** POST https://ind-thomas.hyperverge.co/v1/mobileLookup
- **Data:** Mobile lookup/account-detection results.
- **Docs:** HyperVerge API Documentation

Email OTP Verification — MSG91

- **Purpose:** Verify customer email ownership using OTP.
- **Integration:** REST API / OTP Widget.
- **Flow:** Send OTP → user enters OTP → Verify OTP.
- **Authentication:** authkey.
- **Production / Usage Pricing:** Paid — OTP Widget/SDK infrastructure is free. Email OTP transmission costs ₹0.03 per OTP (exclusive of 18% GST) with zero monthly subscription fees.
- **Pricing:** MSG91 OTP Widget Pricing
- **Data:** OTP verification status / verified access token.
- **Sandbox:** Provider account required.
- **Docs:** MSG91 OTP Widget Documentation

Bank Account Verification — Setu

- **Purpose:** Verify customer bank account details.
- **Integration:** REST API — Sync & Async.
- **Sandbox:** https://dg-sandbox.setu.co
- **Production:** https://dg.setu.co
- **Authentication:** x-client-id + x-client-secret + x-product-instance-id
- **Input:** IFSC + bank account number.
- **Data:** Verification status, account-holder name, transaction reference & verification time.
- **Method:** Penny Drop (₹1 is credited to the bank account being verified).
- **Production / Usage Pricing: Paid** — Per-verification pricing; exact API rate is not publicly listed and is provided during Setu onboarding.

- **Endpoints:** POST /api/verify/ban (Sync), POST /api/verify/ban/async (Async).
- **Docs:** https://docs.setu.co/data/bav/penny-drop/quickstart
- **API Docs:** https://docs.setu.co/data/bav/penny-drop/api-integration

Bank Statement — Setu

- **Purpose:** Fetch and analyze customer bank statement data.
- **Integration:** REST API — AA data / PDF statement.
- **Sandbox:** https://di-uat.setu.co
- **Production:** https://insights.setu.co
- **Authentication:** x-client-id + x-client-secret + x-product-instance-id
- **Input:** Financial data / bank statement PDF.
- **Data:** Account details, balances, transactions & financial insights.
- **Endpoints:** POST /v3/fiData, POST /v3/pdf-ingest
- **Production / Usage Pricing: Paid** — Per-API-call / per-statement commercial pricing; exact rate is not publicly listed.
- **Docs:** https://docs.setu.co/data/insights/quickstart
- **Credit Intelligence:** https://setu.co/credit-intelligence

Account Aggregator — Setu

- **Purpose:** Access customer financial data through the Account Aggregator framework with consent.
- **Integration:** REST API / FIU APIs.
- **Sandbox:** Setu AA Sandbox.
- **Authentication:** x-client_id + x-client-secret + x-product-instance-id
- **Data:** Bank, deposits, investments and other supported financial information.
- **Consent:** Customer consent is required through the AA framework.
- **Production:** Requires KYC, review and Sahamati onboarding.
- **Production / Usage Pricing: Paid** — Per-API-call / per-session commercial pricing; exact rate is not publicly listed.
- **Docs:** https://docs.setu.co/data/account-aggregator/quickstart
- **API Docs:** https://docs.setu.co/data/account-aggregator/api-integration

Financial Information — Setu

- **Purpose:** Access customer financial information with consent.
- **Integration:** Account Aggregator REST APIs.

- **Sandbox:** Setu AA Sandbox / Setu FIP.
- **Authentication:** Access token + x-product-instance-id.
- **Consent:** Customer consent required before data access.
- **Data:** Profile, account summary, transactions and supported financial data.
- **Formats:** JSON / XML.
- **Endpoints:** POST /sessions (create data session), GET /sessions/:id (fetch FI data).
- **Production / Usage Pricing: Paid** — Per-data-session / FI-fetch commercial pricing; exact rate is not publicly listed.
- **Docs:** https://docs.setu.co/data/account-aggregator/fi-data-types
- **API Docs:** https://docs.setu.co/data/account-aggregator/api-integration/data-apis

FD / Deposit Information — Setu

- **Purpose:** Access customer deposit and FD-related financial information through the Account Aggregator framework.
- **Integration:** Account Aggregator REST APIs.
- **Sandbox:** Setu FIP with mock FI data.
- **Authentication:** Setu AA credentials.
- **Consent:** Customer consent is required before accessing financial data.
- **Supported Data Types:** DEPOSIT, TERM_DEPOSIT, RECURRING_DEPOSIT.
- **Data:** Account-holder profile, deposit summary, account details and transactions.
- **Formats:** JSON / XML.
- **Flow:** Create Consent → Customer approves → Create Data Session → Fetch FI Data.
- **Production / Usage Pricing: Paid** — Per-data-session / FI-fetch commercial pricing; exact rate is not publicly listed.
- **Docs:** https://docs.setu.co/data/account-aggregator/fi-data-types
- **API Docs:** https://docs.setu.co/data/account-aggregator/api-integration/data-apis

Source of Funds — Perfios

- **Provider:** Perfios
- **Relevant APIs:** Bank Statement Analysis API / Income Verification API.
- **Purpose:** Analyse financial/bank-statement data to identify income and financial sources.
- **API Platform:** Perfios Hub.
- **Sandbox:** Available through Perfios Hub with test credits.

- **Production / Live Usage: Paid** — Commercial volume-based pricing applies for live transactions; exact public rate is not listed.
- **Technical API Documentation:** Requires Perfios Hub access.

Public Reference: https://perfios.ai/in/products/perfios-hub

Current Employment — Scofit

- **Purpose:** Verify employment status, income and EPFO records using UAN.
- **Integration:** REST API — POST.
- **Endpoint:** https://api.scofit.app/v1/employment/verify
- **Input:** UAN, consent and verification purpose.
- **Authentication:** Bearer API key.
- **Data:** Current employer, employment status, tenure, estimated income, PF balance, last contribution and employment history.
- **Features:** UAN validation, PF details, employment history, income estimation and last-employer verification.
- **Sandbox / Testing: Paid / Developer Account Required** — Business onboarding is required for API access/testing.
- **Production / Live Usage: Paid** — Commercial per-check transactional pricing model; exact public rate is not listed.
- **Docs:** https://www.scofit.app/apis/employment-verification/

Other identified providers: FastKYC.

Employment Status — Scofit

- **Purpose:** Verify a person's current employment status using UAN and EPFO records.
- **Endpoint:** https://api.scofit.app/v1/employment/verify
- **Input:** UAN, consent and verification purpose.
- **Authentication / Integration:** Bearer API key and REST API.
- **Data:** UAN status, current employer, employment status, tenure, PF balance, last contribution date and employment history.
- **Employment Status:** Active, exited or transferred.
- **Additional Data:** Income estimation and PF contribution history.
- **Use Cases:** Loan underwriting, credit-card assessment, rental/housing verification and background checks.
- **Sandbox / Testing: Not publicly documented.** Availability can be confirmed through Scofit's developer onboarding.

- **Production / Live Usage: Paid** — Commercial transactional per-check billing model; exact public rate is not listed.

Docs: https://www.scofit.app/apis/employment-verification/

🔵 FREE TIER + PAID PRODUCTION APIS

Public Web Search — Brave Search

- **Purpose:** Search publicly available web information for verification and background research.
- **Provider:** Brave Search
- **Integration:** REST API.
- **Method:** GET
- **Endpoint:** https://api.search.brave.com/res/v1/web/search
- **Authentication:** x-subscription-token API key.
- **Input:** Search query (q).
- **Data:** Web search results, titles, URLs and descriptions/snippets.
- **Coverage:** Brave's independent web search index.
- **Sandbox:** Developer API access available.
- **Production / Usage Pricing: Paid** — Search API pricing starts at approximately **$5 per 1,000 requests**, with **$5 in monthly free credits** for developers.
- **Docs:** https://api-dashboard.search.brave.com/documentation
- **API Reference:** https://api-dashboard.search.brave.com/api-reference/web/search/get
- **Other identified providers:** Google, Microsoft Bing, Tavily, other licensed web-search providers.

News / Media Search — Brave News Search API

- **Purpose:** Search news and media coverage for verification, background research and media monitoring.
- **Provider and Integration:** Brave Search / REST API.
- **API and Method:** Brave News Search API / GET.
- **Endpoint:** https://api.search.brave.com/res/v1/news/search
- **Authentication:** X-Subscription-Token: YOUR_API_KEY
- **Input:** Search query (q); optional country, language, freshness, count and other filters.
- **Data:** News article title, source URL, description, publication/page age, source profile and other metadata.

- **Freshness:** Supports last 24 hours, 7 days, 31 days, 365 days and custom date ranges.
- **Sandbox / Testing:** Developer API access available.
- **Coverage:** News articles from Brave's independent search index and news sources worldwide.
- **Production / Usage Pricing: Paid** — Brave Search API pricing starts at approximately **$5 per 1,000 requests**, with **$5 in monthly free credits** for developers.
- **Docs:** https://api-dashboard.search.brave.com/documentation
- **API Reference:** https://api-dashboard.search.brave.com/api-reference/news/news_search/get
- **Developer Portal:** https://api-dashboard.search.brave.com/
- **Other identified providers:** GDELT, NewsAPI, licensed news-data providers.

MCA Company Verification — Attestr

- **Purpose:** Verify Indian company registration and incorporation details.
- **Integration:** REST API — POST.
- **Endpoint:** https://api.attestr.com/api/{version}/public/corpx/business/master
- **Version / Input:** v2 / CIN, LLPIN, FLLPIN or FCRN.
- **Authentication:** Authorization: Basic {authToken}
- **Data:** Company status, name, registration details, capital, incorporation date, address, directors and compliance information.
- **Optional:** E-filings and charge details.
- **Sandbox / Testing: Free** — Limited complimentary demo credits are provided for testing with predefined sample data.
- **Production / Live Usage: Paid** — Prepaid pay-as-you-go wallet model. Credits do not expire; default pricing is available in the Attestr console.
- **Docs:** https://docs.attestr.com/attestr-docs/indian-company-registration-verification-api

Other identified providers: MCA, Indiconnect, HyperVerge.

Director Verification — Attestr

- **Purpose:** Verify company directors and their registration details.
- **API:** Same Company Registration Verification API.
- **Data:** Director name, DIN, appointment date, role, designation and disqualification status.
- **Sandbox / Testing: Free** — Limited trial credits available for testing.
- **Production / Live Usage: Paid** — Prepaid pay-as-you-go wallet model with per-request pricing shown in the Attestr dashboard.
- **Docs:** https://docs.attestr.com/attestr-docs/indian-company-registration-verification-api

Other identified providers: MCA, Indiconnect.

Company Search — Attestr

- **Purpose:** Search registered companies by company name.
- **Integration and Version:** REST API — POST / v2.
- **Endpoint:** https://api.attestr.com/api/{version}/public/corpx/business/autocomplete
- **Input:** Company name (minimum 3 characters).
- **Authentication:** Authorization: Basic {authToken}
- **Data:** Company name, status, type, incorporation date and address.
- **Sandbox / Testing: Free** — Limited trial credits available for testing with predefined sample inputs.
- **Production / Live Usage: Paid** — Prepaid pay-as-you-go wallet model with per-request pricing shown in the dashboard.
- **Docs:** https://docs.attestr.com/attestr-docs/company-name-autocomplete-api

Other identified provider: Indiconnect.

LLP Verification — Attestr

- **Purpose:** Verify LLP registration and details.
- **Integration:** REST API.
- **Input:** LLPIN / registration number.
- **Authentication:** Authorization: Basic {authToken}
- **Data:** LLP registration details, status, name, incorporation date, address and partners.
- **Sandbox / Testing: Free** — Limited complimentary demo credits available for testing.
- **Production / Live Usage: Paid** — Prepaid pay-as-you-go wallet model with non-expiring credits and per-request pricing shown in the dashboard.
- **Docs:** https://docs.attestr.com/attestr-docs/indian-company-registration-verification-api

Other identified provider: HyperVerge.

GST Verification — HyperVerge

- **Purpose:** Verify GST registration details.
- **Integration:** REST API.
- **Region:** India APIs.
- **Input:** GSTIN.
- **Data:** GST registration and business verification details.
- **Authentication:** Not specified on the API Reference page.

- **Endpoint:** Not specified on this page.
- **Sandbox / Testing: Free Trial** — 1-month free trial available in the sandbox/developer environment.
- **Production / Live Usage: Paid** — Tiered Start, Grow and Enterprise plans. Exact production pricing is customized/volume-based; no fixed per-verification price is publicly listed on the API Reference page.
- **Docs:** https://documentation.hyperverge.co/api-reference/india_api/

Other identified provider: Attestr.

GSTIN Details — HyperVerge

- **Purpose:** Retrieve and verify GSTIN-related business details.
- **Integration:** REST API.
- **Region and Input:** India APIs / GSTIN.
- **Data:** GST registration and business details.
- **Authentication:** Not specified in the public API Reference page.
- **Endpoint:** Not specified in the public API Reference page.
- **Sandbox / Testing: Free Trial** — 1-month free trial available in the sandbox/developer environment.
- **Production / Live Usage: Paid** — Tiered Start, Grow and Enterprise plans with customized/volume-based billing; no fixed per-check price is publicly listed on the API Reference page.
- **Docs:** https://documentation.hyperverge.co/api-reference/india_api/

Udyam / MSME Verification — Indiconnect

- **Purpose:** Verify Udyam/MSME registration details without OTP.
- **Integration:** GraphQL mutation over HTTP POST.
- **Sandbox Endpoint:** https://api.staging.indiconnect.in/idverifygr/verification
- **Input:** Udyam Registration Number + document type.
- **Authentication:** myAppId, service-key, Authorization, Content-Type.
- **Data:** Udyam number, registration date, enterprise name, major activity, organization type, official address, industry/NIC classification, enterprise type and certificate data.
- **Sandbox: Confirmed** — Staging environment available with test credentials.
- **Other option:** Udyam Registration Send OTP + OTP Verify APIs.
- **Production / Live Usage: Paid** — Prepaid model through IndiConnect's BizStack ecosystem. Exact per-request pricing is tier-dependent; the provided source states approximately ₹1.80–₹3.00 per request.

- **Docs:** https://developer.indiconnect.in/31360625e0

Other identified providers: HyperVerge, TrustHub.

AML Screening — Dilisense

- **Purpose:** Screen individuals and companies for AML/compliance risks.
- **Integration:** REST API — GET / POST JSON
- **Endpoint:** https://api.dilisense.com/v1/
- **Authentication:** API Key passed via header (x-api-key)
- **Input:** Entity name/person or company details; optional DOB, country, entity type and other filters.
- **Data:** Sanctions, PEP, warnings and adverse-media results.
- **AML Types:** Sanction, PEP, warning, plus multiple adverse-media categories.
- **Sandbox: Confirmed — Free Developer Tier** includes 100 free requests per month with no upfront credit card required.
- **Cost: Paid** — Pay-as-you-go pricing starts at **€0.10 per API call** on the starter tier.
- **Docs:** https://dilisense.com/en/api

PEP Screening — Dilisense

- **Purpose:** Screen individuals/entities for Politically Exposed Person (PEP) status.
- **Integration:** REST API — GET / POST JSON
- **Endpoint:** https://api.dilisense.com/v1/
- **Authentication:** API Key passed via header (x-api-key)
- **Input:** Person/entity name; optional DOB, country and entity type.
- **PEP Types:** Supports PEP, PEP-class-1, PEP-class-2, PEP-class-3, and PEP-class-4.
- **Data:** Matched PEP entities, sources, associated information, match status and risk level.
- **Sandbox: Confirmed — Free Developer Tier** includes 100 free requests per month with no upfront credit card required.
- **Cost: Paid** — Pay-as-you-go pricing starts at **€0.10 per API call** on the starter tier.
- **Docs:** https://dilisense.com/en/api

Sanctions Screening — OpenSanctions

- **Purpose:** Screen individuals and companies against global sanctions, export controls, and consolidated watchlists.
- **Integration:** REST API — GET / POST JSON
- **Endpoint:** https://api.opensanctions.org/

- **Authentication:** API Key passed via header (Authorization: ApiKey …)
- **Input:** Person/company name; optional DOB, country and entity type.
- **Data:** Sanctions matches, source lists, matched entity details, match status and risk level.
- **Sanctions Filter:** Supports filtering by dataset, topic, and entity type.
- **Sandbox: Confirmed — Free community tier** available for testing.
- **Cost: Paid** — Pay-as-you-go pricing starts at **€0.10 per query** on the developer tier.
- **Docs:** https://www.opensanctions.org/docs/api/

Adverse Media — Dilisense

- **Purpose:** Screen individuals and companies for adverse-media risk.
- **Integration:** REST API — GET / POST JSON
- **Endpoint:** https://api.dilisense.com/v1/
- **Authentication:** API Key passed via header (x-api-key)
- **Input:** Person/company name; optional DOB, country and entity type.
- **Data:** Adverse-media matches, sources, matched entities, match status and risk level.
- **Media Categories:** Supports multiple adverse-media categories through search filters.
- **Sandbox: Confirmed — Free Developer Tier** includes 100 free requests per month with no upfront credit card required.
- **Cost: Paid** — Pay-as-you-go pricing starts at **€0.10 per API call** on the starter tier.
- **Docs:** https://dilisense.com/en/api

Ongoing Monitoring — OpenSanctions

- **Purpose:** Continuously monitor individuals and companies for new AML/compliance risk matches.
- **Integration:** REST API — GET / POST JSON
- **Endpoint:** https://api.opensanctions.org/
- **Monitoring:** Existing searches can be monitored for changes and new matches.
- **Monitoring Operations:** Start/stop monitoring and manage monitored searches.
- **Authentication:** API Key passed via header (Authorization: ApiKey …)
- **Data:** New sanctions, PEP, warning and adverse-media matches.
- **Risk Information:** Match status, risk level, matched entities and sources.
- **Sandbox: Confirmed — Free community tier** available for testing.
- **Cost: Paid** — Pay-as-you-go pricing starts at **€0.10 per query** on the developer tier.

Docs: https://www.opensanctions.org/docs/api/

Court Records — eCourtsIndia

- **Purpose:** Search and retrieve Indian court records for litigation/legal verification.
- **Integration:** REST API — JSON.
- **Base URL:** https://webapi.ecourtsindia.com
- **Authentication:** Bearer Token — Authorization: Bearer eci_live_YOUR_API_KEY
- **Endpoints:** Case Search, Case Details, Order Download, Cause List Search, Case Refresh and Bulk Case Refresh.
- **Data:** Case details, litigants, advocates, judges, hearing history, orders, judgments and case status.
- **Coverage:** Supreme Court, High Courts, District Courts and Tribunals.
- **Sandbox:** No separate sandbox documented; new accounts receive **₹200 free API credits**.
- **Production / Live Usage: Paid** — ₹0.60 per Case Search on Pay-As-You-Go or ₹0.20 on Enterprise.
- **Docs:** https://ecourtsindia.com/api/docs
- **Pricing:** https://ecourtsindia.com/api/pricing

Other identified providers: Indian Kanoon, CrimeCheck.

Tribunal Records — eCourtsIndia

- **Purpose:** Search and retrieve Indian tribunal records for legal/litigation verification.
- **Integration:** REST API — JSON.
- **Base URL:** https://webapi.ecourtsindia.com
- **Authentication:** Bearer Token — Authorization: Bearer eci_live_YOUR_API_KEY
- **Endpoints:** Case Search, Case Details, Order Download, Cause List Search and Case Refresh.
- **Data:** Tribunal cases, parties/litigants, advocates, judges, hearings, orders and case status.
- **Coverage:** NCLT, NCLAT and other specialized tribunals.
- **Sandbox:** No separate sandbox documented; new accounts receive **₹200 free API credits**.
- **Production / Live Usage: Paid** — Case Search costs ₹0.60 per request on Pay-As-You-Go or ₹0.20 on Enterprise.
- **Docs:** https://ecourtsindia.com/api/docs
- **Pricing:** https://ecourtsindia.com/api/pricing

Other identified providers: Vakeel360, CrimeCheck.

Litigation Search — eCourtsIndia

- **Purpose:** Search litigation involving an individual or company for legal due diligence.
- **Integration:** REST API — JSON.
- **Base URL:** https://webapi.ecourtsindia.com
- **Authentication:** Bearer Token — Authorization: Bearer eci_live_YOUR_API_KEY
- **Endpoint:** GET /api/partner/search
- **Search By:** Litigant, petitioner, respondent, advocate, judge, court, case type and dates.
- **Data:** Case status, parties, filing/registration dates, hearings, judges, advocates and case category.
- **Sandbox:** No separate sandbox documented; new accounts receive **₹200 free API credits**.
- **Production / Live Usage: Paid** — Litigation/Case Search costs ₹0.60 per request on Pay-As-You-Go or ₹0.20 on Enterprise.
- **Docs:** https://ecourtsindia.com/api/docs
- **Pricing:** https://ecourtsindia.com/api/pricing

Other identified providers: CLAW, Casetrail.

Legal Case Monitoring — eCourtsIndia

- **Purpose:** Monitor court cases for status and hearing updates.
- **Integration:** REST API — JSON.
- **Base URL:** https://webapi.ecourtsindia.com
- **Authentication:** Bearer Token — Authorization: Bearer eci_live_YOUR_API_KEY
- **Endpoints:** Case Refresh, Bulk Case Refresh and Bulk Refresh Status.
- **Data:** Updated case status, hearing dates, orders and other refreshed case information.
- **Case Refresh:** POST /api/partner/case/{cnr}/refresh
- **Bulk Refresh:** POST /api/partner/case/bulk-refresh
- **Sandbox:** No separate sandbox documented; new accounts receive **₹200 free API credits**.
- **Production / Live Usage: Paid** — Case Refresh costs ₹0.15 per CNR on Pay-As-You-Go or ₹0.05 per CNR on Enterprise. Bulk Case Refresh has the same per-CNR rates.
- **Docs:** https://ecourtsindia.com/api/docs
- **Pricing:** https://ecourtsindia.com/api/pricing

Other identified providers: eCourtsIndia, CLAW.

Court Orders / Judgments — eCourtsIndia

- **Purpose:** Retrieve court orders and judgments for legal verification and due diligence.
- **Integration:** REST API — JSON.
- **Base URL:** https://webapi.ecourtsindia.com
- **Authentication:** Bearer Token — Authorization: Bearer eci_live_YOUR_API_KEY
- **Endpoint:** GET /api/partner/case/{cnr}/order/{filename}
- **Data:** Court orders, judgments, order metadata and extracted order text.
- **Formats:** Certified-true-copy PDF and Markdown/text.
- **AI Analysis:** Order summary, outcome, legal provisions and key points.
- **Sandbox:** No separate sandbox documented; new accounts receive **₹200 free API credits**.
- **Production / Live Usage: Paid** — Order PDF download costs ₹3.75 on Pay-As-You-Go or ₹1.25 on Enterprise. Order + AI Summary costs ₹7.50 or ₹2.50 respectively.
- **Docs:** https://ecourtsindia.com/api/docs
- **Pricing:** https://ecourtsindia.com/api/pricing

Other identified providers: Indian Kanoon, eCourtsIndia.

Mutual Fund Holdings — CASParser

- **Purpose:** Retrieve structured mutual fund holdings, folios and transaction data from CAMS/KFintech CAS.
- **Provider and Authentication:** CASParser / x-api-key
- **Integration:** REST API; Python, Node.js and TypeScript SDKs available.
- **Endpoint:** POST https://api.casparser.in/v4/cams_kfintech/parse
- **Recommended endpoint:** POST https://api.casparser.in/v4/smart/parse — automatically detects CAS type.
- **Input:** CAS PDF + password/PAN where required.
- **Data:** Investor details, mutual-fund folios, holdings, transactions and portfolio summary.
- **CAMS/KFintech coverage:** Yes.
- **Sandbox:** Yes — sandbox-with-json-responses. Returns sample data without consuming credits.
- **Production / Live Usage: Free plan available with 10 credits/month. Paid plans start at ₹999/month for 50 credits, ₹3,500/month for 200 credits and ₹10,500/month for 750 credits. 1 CAS parse = 1 credit.**
- **Docs:** https://casparser.in/docs
- **Pricing:** https://casparser.in/pricing/

- **Other identified providers:** CAMS, KFintech / MF Central.

Consolidated Account Statement — CASParser

- **Purpose:** Retrieve consolidated investment data from CAMS/KFintech CAS.
- **Provider and Integration:** CASParser / REST API
- **Endpoint:** POST https://api.casparser.in/v4/cams_kfintech/parse
- **Authentication:** x-api-key
- **Sandbox:** Yes — sandbox-with-json-responses
- **Input:** CAS PDF
- **Data:** Investor details, mutual fund holdings, folios and transactions.
- **CAMS/KFintech Coverage:** Yes.
- **Production / Live Usage: Free plan available with 10 credits/month. Paid API plans start at ₹999/month for 50 credits. 1 CAS parse = 1 credit.**
- **Docs:** https://casparser.in/docs/quickstart
- **Pricing:** https://casparser.in/pricing/
- **Other identified providers:** CAMS, KFintech / MF Central.

Demat / Securities Holdings — CASParser

- **Purpose:** Retrieve structured demat and securities holdings from CDSL/NSDL statements.
- **Provider and Integration:** CASParser / REST API
- **Endpoint:** POST https://api.casparser.in/v4/cdsl/parse / POST https://api.casparser.in/v4/nsdl/parse
- **Authentication:** x-api-key
- **Sandbox:** Yes — sandbox-with-json-responses
- **Input:** CDSL/NSDL CAS PDF
- **Data:** Equity holdings, bonds, securities, quantities, values and transaction details.
- **CDSL/NSDL Coverage:** Yes.
- **Production / Live Usage: Free plan available with 10 credits/month. CDSL/NSDL parsing is included in paid plans starting at ₹999/month; Pro at ₹3,500/month includes all CDSL/NSDL parsers. 1 CAS parse = 1 credit.**
- **Docs:** https://casparser.in/docs/quickstart
- **Pricing:** https://casparser.in/pricing/
- **Other identified providers:** CDSL, NSDL ecosystem.

Equity Holdings — CASParser

- **Purpose:** Retrieve structured equity holdings from CDSL/NSDL investment statements.
- **Provider and Integration:** CASParser / REST API
- **Endpoint:** POST https://api.casparser.in/v4/cdsl/parse / POST https://api.casparser.in/v4/nsdl/parse
- **Authentication:** x-api-key
- **Sandbox:** Yes — sandbox-with-json-responses
- **Input:** CDSL/NSDL CAS PDF
- **Data:** Equity holdings, securities, quantities, values and transaction details.
- **Coverage:** CDSL and NSDL.
- **Production / Live Usage: Free plan available with 10 credits/month. Paid plans start at ₹999/month; CDSL/NSDL parsers are included in the Pro plan at ₹3,500/month and above.**
- **Docs:** https://casparser.in/docs/quickstart
- **Pricing:** https://casparser.in/pricing/
- **Other identified providers:** CDSL, NSDL ecosystem.

Bonds / Government Securities — CASParser

- **Purpose:** Retrieve structured bond and government-security holdings from investment statements.
- **Provider and Integration:** CASParser / REST API
- **Endpoint:** POST https://api.casparser.in/v4/cdsl/parse / POST https://api.casparser.in/v4/nsdl/parse
- **Authentication:** x-api-key
- **Sandbox:** Yes — sandbox-with-json-responses
- **Input:** CDSL/NSDL CAS PDF
- **Data:** Bond holdings, government securities, quantities, values and transaction details.
- **Coverage:** CDSL and NSDL.
- **Production / Live Usage: Free plan available with 10 credits/month. Paid plans start at ₹999/month; full CDSL/NSDL parser access is included from the Pro plan at ₹3,500/month.**
- **Docs:** https://casparser.in/docs/quickstart
- **Pricing:** https://casparser.in/pricing/
- **Other identified providers:** CDSL, NSDL ecosystem.

AIF Holdings — CASParser

- **Purpose:** Retrieve structured AIF holdings from investment statements.
- **Provider and Integration:** CASParser / REST API
- **Endpoint:** POST https://api.casparser.in/v4/cdsl/parse / POST https://api.casparser.in/v4/nsdl/parse
- **Authentication:** x-api-key
- **Sandbox:** Yes — sandbox-with-json-responses
- **Input:** CDSL/NSDL CAS PDF
- **Data:** AIF holdings, investment details, quantities/units, values and transaction details.
- **Coverage:** CDSL and NSDL.
- **Production / Live Usage: Free plan available with 10 credits/month. Paid plans start at ₹999/month; AIF parsing through supported CAS statements is included in the available parser framework.**
- **Docs:** https://casparser.in/docs/quickstart
- **Pricing:** https://casparser.in/pricing/
- **Other identified providers:** CDSL, NSDL ecosystem.

Insurance / NPS Holdings — CASParser

- **Purpose:** Retrieve structured insurance and NPS holdings from investment statements.
- **Provider and Integration:** CASParser / REST API
- **Endpoint:** POST https://api.casparser.in/v4/smart/parse
- **Authentication:** x-api-key
- **Sandbox:** Yes — sandbox-with-json-responses
- **Input:** CAS PDF
- **Data:** Insurance holdings, NPS holdings, investment details and related portfolio information.
- **Coverage:** CASParser supports insurance and NPS data within its 9-asset-class parsing framework.
- **Production / Live Usage: Free plan available with 10 credits/month. Paid plans start at ₹999/month for 50 credits. 1 CAS parse = 1 credit.**
- **Docs:** https://casparser.in/docs/quickstart
- **Pricing:** https://casparser.in/pricing/
- **Other identified providers:** CAMS, KFintech / MF Central.

Portfolio Analytics — CASParser

- **Purpose:** Analyse investment portfolio data and generate structured portfolio insights.
- **Provider and Integration:** CASParser / REST API
- **Endpoint:** POST https://api.casparser.in/v4/smart/parse
- **Authentication:** x-api-key
- **Sandbox:** Yes — sandbox-with-json-responses
- **Input:** CAS PDF / supported investment statements
- **Data:** Portfolio holdings, asset allocation, investment values and transaction data.
- **Coverage:** CDSL, NSDL, CAMS and KFintech supported.
- **Production / Live Usage: Free plan available with 10 credits/month. Paid plans start at ₹999/month for 50 credits, with higher plans at ₹3,500/month and ₹10,500/month.**
- **Docs:** https://casparser.in/docs/quickstart
- **Pricing:** https://casparser.in/pricing/
- **Other identified providers:** FintegrationFS.

Mutual Fund Portfolio Data — CASParser

- **Purpose:** Retrieve structured mutual fund portfolio data from CAMS/KFintech statements.
- **Provider and Integration:** CASParser / REST API
- **Endpoint:** POST https://api.casparser.in/v4/cams_kfintech/parse
- **Authentication:** x-api-key
- **Sandbox:** Yes — sandbox-with-json-responses
- **Input:** CAMS/KFintech CAS PDF
- **Data:** Mutual fund holdings, folios, schemes, units, valuations and transactions.
- **Coverage:** CAMS and KFintech.
- **Production / Live Usage: Free plan available with 10 credits/month. Paid plans start at ₹999/month for 50 credits, ₹3,500/month for 200 credits and ₹10,500/month for 750 credits.**
- **Docs:** https://casparser.in/docs/quickstart
- **Pricing:** https://casparser.in/pricing/
- **Other identified providers:** MF Central, FintegrationFS.

Address Verification — Mappls

- **Purpose:** Verify the geographical validity and consistency of a customer's address.
- **Integration:** REST API.
- **Authentication:** access_token.
- **Sandbox:** API access requires creating a Mappls developer account and enabling the service via the API Console.
- **Data:** Address/location verification and geospatial assessment.
- **Production / Usage Pricing:** Free tier available to start; production API pricing scales based on consumption tiers.
- **Pricing:** Mappls API Pricing

Docs: Mappls Location Verification API Documentation

Source of Wealth — Setu

- **Purpose:** Access customer financial and investment data to support source-of-wealth assessment.
- **Integration:** Account Aggregator REST APIs.
- **Sandbox:** Setu FIP provides mock financial data for testing.
- **Consent:** Customer consent is required.
- **Data:** Deposits, term deposits, mutual funds, bonds, government securities, AIFs, equities and other supported financial assets.
- **Financial Fields:** Current/investment value, principal amount, holdings, transactions, purchase/redemption information and account details.
- **Formats:** JSON / XML.
- **Flow:** Create Consent → Approve Consent → Create Data Session → Fetch FI Data.
- **Sandbox / Testing: Free** — Sandbox testing with mock financial data is available.
- **Production / Live Usage: Paid** — Commercial pricing applies for live Account Aggregator transactions and production data fetches.
- **Docs:** https://docs.setu.co/data/account-aggregator/fi-data-types
- **API Docs:** https://docs.setu.co/data/account-aggregator/api-integration/data-apis

Asset & Concentration Analysis — Setu

- **Purpose:** Analyse customer financial assets and generate portfolio/financial insights.
- **Integration:** Setu Insights REST API.
- **Data Sources:** Bank statements, equities, mutual funds and ETFs.

- **Input:** AA-sourced financial data or bank-statement PDFs.
- **Analysis:** Templates allow business users to select required financial insights; Portfolio Management is a supported use case.
- **Endpoints:**
    - POST /v3/fiData — ingest financial data.
    - POST /v3/pdf-ingest — ingest bank statements.
    - POST /v3/insight — generate insights.
    - GET /v3/insight?reportId={reportId} — retrieve results.
- **Output:** JSON / XLSX.
- **Data Deletion:** /v3/purge supports customer-data deletion.
- **Sandbox / Testing: Free** — Developer documentation, quickstarts and test flows are available.
- **Production / Live Usage: Paid** — Commercial pricing applies to production use; exact public rate is not listed.
- **Docs:** https://docs.setu.co/data/insights/quickstart
- **API Docs:** https://docs.setu.co/data/insights/quickstart/api-integration

Credit Score — TransUnion CIBIL

- **Purpose:** Obtain a consumer's credit report and credit score for credit-risk assessment.
- **Integration:** API-based credit data service.
- **Products:** Consumer Credit Risk Assessment; DTC Consumer Connect Services.
- **Data:** Credit history, credit report and credit score.
- **API Access:** Requires registration and access approval through a TransUnion CIBIL KAM.
- **UAT:** Available after access; API specifications can be tested using “Try it out.”
- **Production:** Requires completion of applicable legal documentation and UAT integration.
- **Authentication / Endpoints:** Not publicly shown; available inside the API Marketplace after login.
- **Sandbox / Testing: Free** — Developer API Marketplace access includes a “Try it out” feature using hardcoded/synthetic test data.
- **Production / Live Usage: Paid** — Requires a formal member/enterprise agreement, regulatory compliance and commercial pricing arranged with TransUnion CIBIL.
- **Docs / API Marketplace:** https://apimarketplace.transunioncibil.com/
- **Other identified providers:** Experian, Equifax, CRIF High Mark.

Credit Report — TransUnion CIBIL

- **Purpose:** Obtain a consumer's credit report and credit history for credit assessment.
- **Integration:** API-based credit data service.
- **Product:** DTC Consumer Connect Services.
- **Data:** Credit report, credit history and related credit information.
- **API Access:** Requires registration and access approval through a TransUnion CIBIL KAM.
- **UAT:** Available after access; API specifications can be tested using "Try it out."
- **Production:** Requires applicable legal documentation and completion of UAT integration.
- **Authentication / Endpoints:** Not publicly shown; available inside the API Marketplace after login.
- **Sandbox / Testing / UAT: Free** — Developer testing options are available through the API Marketplace after registration and approval.
- **Production / Live Usage: Paid** — Requires formal legal agreements, member onboarding and commercial pricing per credit check.
- **Docs / API Marketplace:** https://apimarketplace.transunioncibil.com/
- **Other identified providers:** Experian, Equifax, CRIF High Mark.

Credit Risk — TransUnion CIBIL

- **Purpose:** Assess consumer credit risk using credit history and credit scoring information.
- **Integration:** API-based credit data service.
- **Product:** Consumer Credit Risk Assessment.
- **Data:** Credit history and credit scores, including new-to-credit and personal-loan-specific scores.
- **API Access:** Requires registration and access approval through a TransUnion CIBIL KAM.
- **UAT:** Available after access; API specifications can be tested using "Try it out."
- **Production:** Requires applicable legal documentation and completion of UAT integration.
- **Authentication / Endpoints:** Not publicly shown; available inside the API Marketplace after login.
- **Sandbox / Testing / UAT: Free** — Developer documentation and "Try it out" testing with test/synthetic profiles are available.
- **Production / Live Usage: Paid** — Requires formal business onboarding, legal compliance agreements and commercial transaction pricing or subscription packages arranged through TransUnion CIBIL.
- **Docs / API Marketplace:** https://apimarketplace.transunioncibil.com/

- **Other identified providers:** Experian, CRIF High Mark.

UAN Verification — Attestr

- **Purpose:** Verify UAN and retrieve employment history.
- **Integration:** REST API — POST.
- **Endpoint:** https://api.attestr.com/api/{version}/public/checkx/epfo/uan
- **Version and Input:** v2 / 12-digit UAN.
- **Authentication:** Authorization: Basic {authToken}.
- **Data:** UAN validity, employee name, employer, EPFO member ID, joining date and exit date.
- **Consent / Compliance:** Explicit, informed and verifiable consent required under Attestr's DPDP V3 framework.
- **Error Handling:** Authorization, access, provisioning, IP whitelist and rate-limit errors supported.
- **Sandbox / Testing: Free** — Limited demo credits are provided for testing.
- **Production / Live Usage: Paid** — Prepaid Pay-As-You-Go wallet model with non-expiring credits; per-request pricing is available in the Attestr dashboard.
- **Docs:** https://docs.attestr.com/attestr-docs/epfo-uan-verification-employment-history-api

Other identified providers: Instantpay, Indiconnect.

UAN Lookup — Indiconnect

- **Purpose:** Retrieve UAN associated with a registered mobile number.
- **Integration:** GraphQL mutation over REST POST.
- **Sandbox Endpoint:** https://api.staging.indiconnect.in/idverifygr/verification
- **Input:** Registered mobile number + document type.
- **Authentication:** myAppId, service-key, Authorization.
- **Data:** UAN(s), request ID, status code and case ID.
- **Use Cases:** Employee onboarding, employment verification and background verification.
- **Sandbox / Testing: Free** — Staging environment available with test credentials.
- **Production / Live Usage: Paid** — Commercial per-transaction pricing; exact public rate is not listed.
- **Docs:** https://developer.indiconnect.in/32552580e0

Other identified providers: Attestr, Profiden.

Employment History — Attestr

- **Purpose:** Verify UAN and retrieve employee employment history.
- **Integration:** REST API — POST.
- **Endpoint:** https://api.attestr.com/api/{version}/public/checkx/epfo/uan
- **Version:** v2.
- **Input:** 12-digit UAN.
- **Authentication:** Authorization: Basic {authToken}.
- **Data:** Employee name, employer, EPFO member ID, joining date and exit date.
- **Compliance:** Explicit consent required under Attestr's DPDP V3 framework.
- **Sandbox / Testing: Free** — Limited demo/trial credits available.
- **Production / Live Usage: Paid** — Prepaid Pay-As-You-Go wallet model with non-expiring credits and per-request pricing shown in the dashboard.
- **Docs:** https://docs.attestr.com/attestr-docs/epfo-uan-verification-employment-history-api

Other identified providers: Indiconnect, Profiden.

Previous Employment — Attestr

- **Purpose:** Retrieve previous employment history using UAN.
- **Integration:** REST API — POST.
- **Endpoint:** https://api.attestr.com/api/{version}/public/checkx/epfo/uan
- **Version and Input:** v2 / 12-digit UAN.
- **Authentication:** Authorization: Basic {authToken}.
- **Data:** Previous employers, EPFO member IDs, joining dates and exit dates.
- **Compliance:** Explicit consent required under DPDP V3.
- **Sandbox / Testing: Free** — Sample/test inputs and limited trial credits available.
- **Production / Live Usage: Paid** — Prepaid Pay-As-You-Go wallet model with non-expiring credits and custom bulk pricing.
- **Docs:** https://docs.attestr.com/attestr-docs/epfo-uan-verification-employment-history-api

Other identified providers: Profiden.

Employer Verification — FastKYC

- **Purpose:** Verify a person's current employer and employment details using provident fund records.
- **Integration:** REST API / API-based integration.
- **Data Source:** Provident Fund / EPFO records.

- **Data:** Employer name, role, employment type and length of service.
- **Use Cases:** Employment verification, background verification, loan underwriting and employer validation.
- **Authentication:** API key; exact authentication header is not publicly documented.
- **Endpoint:** Not publicly disclosed.
- **Sandbox / Testing: Free / Developer Access** — Developer console and sandbox testing available after registration.
- **Production / Live Usage: Paid** — Commercial transactional per-check pricing model; exact public rate is not listed.
- **API Documentation:** https://fastkyc.com/apis/current-employment-details/
- **API Catalog:** https://fastkyc.com/apis/employment/

Other identified Providers: Scofit, Attestr, Profiden.

◯ PRICING NOT PUBLICLY LISTED / UNPUBLISHED

Patta / Chitta — Tamil Nadu Land Records / TamilNilam

- **Purpose:** Verify and retrieve Patta / Chitta / land-record details.
- **Provider and Integration:** Tamil Nadu Land Records / TamilNilam — Government land-record data service.
- **Integration:** API-based data service.
- **API Availability:** Available through government land-record systems for authorized platforms/stakeholders.
- **Endpoint / Authentication / Sandbox:** Not publicly documented.
- **Input:** Land/property identification details.
- **Data:** Patta / Chitta and related land-record information.
- **Coverage:** Tamil Nadu.
- **Production / Usage Pricing: Not publicly listed for enterprise/API access.** Citizen-facing government services may have applicable service/processing charges.
- **Portal:** https://eservices.tn.gov.in/eservicesnew
- **Other identified sources:** TamilNilam, Tamil Nadu Survey & Land Records Department.

FMB / Survey Records — Tamil Nadu Land Records / TamilNilam

- **Purpose:** Verify survey details, field measurements and land-boundary information.
- **Provider and Integration:** Tamil Nadu Land Records / TamilNilam — Government land-record data service.
- **Integration:** API-based land-record data service.
- **API Availability:** Available through government land-record systems for authorized platforms/stakeholders.
- **Endpoint / Authentication / Sandbox:** Not publicly documented.
- **Input:** District, Taluk, Village, Survey Number and Sub-Division Number.
- **Data:** FMB details/sketches, survey information and field-boundary information.
- **Coverage:** Tamil Nadu.
- **Production / Usage Pricing: Not publicly listed for enterprise/API access.** Applicable government fees may apply for specific citizen-facing extracts or services.
- **Portal:** https://eservices.tn.gov.in/eservicesnew
- **Other identified sources:** Tamil Nadu Survey & Land Records Department / TamilNilam.

A-Register — Tamil Nadu Land Records / TamilNilam

- **Purpose:** Verify official land-record and registration details recorded in the A-Register.
- **Provider and Integration:** Tamil Nadu Land Records / TamilNilam — Government land-record data service.
- **Integration:** API-based land-record data service.
- **API Availability:** Available through government land-record systems for authorized platforms/stakeholders.
- **Endpoint / Authentication / Sandbox:** Not publicly documented.
- **Input:** District, Taluk, Village, Survey Number and Sub-Division Number.
- **Data:** A-Register land details and related survey/revenue information.
- **Coverage:** Tamil Nadu.
- **Production / Usage Pricing: Not publicly listed for enterprise/API access.** Government service charges may apply to specific record services.
- **Portal:** https://eservices.tn.gov.in/eservicesnew
- **Other identified sources:** Tamil Nadu Survey & Land Records Department / TamilNilam.

Property Ownership — Tamil Nadu Land Records / TamilNilam

- **Purpose:** Verify recorded property/land ownership details.
- **Provider and Integration:** Tamil Nadu Land Records / TamilNilam — Government land-record data service.
- **Integration:** API-based land-record data service.
- **API Availability:** Available through government land-record systems for authorized platforms/stakeholders.
- **Endpoint / Authentication / Sandbox:** Not publicly documented.
- **Input:** Land/property identification details such as district, taluk, village, survey number and subdivision number.
- **Data:** Recorded landowner/Patta details and related land-record information.
- **Coverage:** Tamil Nadu.
- **Production / Usage Pricing: Not publicly listed for enterprise/API access.** Citizen-facing searches may be available through government portals, subject to applicable service rules/fees.
- **Portal:** https://eservices.tn.gov.in/eservicesnew
- **Other identified sources:** Tamil Nadu Survey & Land Records Department / TamilNilam.

Patta Transfer History — TamilNilam

- **Purpose:** Verify Patta ownership-transfer / mutation history for a property.
- **Provider:** TamilNilam / Tamil Nadu Land Records
- **Integration:** API-based land-record data service
- **API Availability:** Available through government land-record systems for authorized platforms/stakeholders.
- **Endpoint / Authentication / Sandbox:** Not publicly documented.
- **Input:** Property/land identification details and Patta-related information.
- **Data:** Patta transfer/mutation information and related land-record details.
- **Coverage:** Tamil Nadu.
- **Production / Usage Pricing: Not publicly listed for enterprise/API access.** Applicable government mutation/application fees may apply.
- **Portal:** https://tamilnilam.tn.gov.in/citizen/
- **Other identified sources:** Tamil Nadu Survey & Land Records Department.

Encumbrance Certificate (EC) — TNREGINET

- **Purpose:** Verify registered encumbrances associated with a property.
- **Provider:** TNREGINET / Tamil Nadu Registration Department
- **Integration:** Government property-registration / EC online service
- **API Availability:** Official EC service confirmed; public developer API not confirmed.
- **API Endpoint:** Not publicly documented.
- **Authentication:** TNREGINET user authentication; API authentication not publicly documented.
- **Sandbox:** UAT portal available, but a dedicated EC API sandbox is not confirmed.
- **Input:** Property/registration details required for EC search.
- **Data:** Encumbrance Certificate / registered transaction information.
- **Coverage:** Tamil Nadu.
- **Production / Usage Pricing: Not publicly listed for enterprise/API access.** Applicable government fees may apply to EC search/certificate services.
- **Production Portal:** TNREGINET
- **UAT Portal:** https://uat.tnregn.in/portal
- **Other identified source:** Tamil Nadu Registration Department.

Registration Records — TNREGINET / Tamil Nadu Registration Department

- **Purpose:** Verify registered property documents and registration transaction details.
- **Provider:** TNREGINET / Tamil Nadu Registration Department
- **Integration:** Government property-registration online service
- **API Availability:** Official registration service confirmed; public developer API not confirmed.
- **API Endpoint:** Not publicly documented.
- **Authentication:** TNREGINET user authentication; API authentication not publicly documented.
- **Sandbox:** UAT portal available, but a dedicated Registration API sandbox is not confirmed.
- **Input:** Property / registration / document details required for the relevant search.
- **Data:** Registered property documents, registration details and related transaction records.
- **Coverage:** Tamil Nadu.
- **Production / Usage Pricing: Not publicly listed for enterprise/API access.** Applicable government fees are governed by the Tamil Nadu Registration Department fee schedules.
- **Production Portal:** TNREGINET
- **UAT Portal:** https://uat.tnregn.in/portal/

- **Other source:** Tamil Nadu Registration Department.

Title Chain — Property Chain

- **Provider:** NIC — Centre of Excellence in Blockchain Technology
- **Purpose:** Verify property ownership and complete transaction/title history.
- **API:** Property Chain API
- **Integration:** API-based property data verification.
- **Method:** API
- **Endpoint:** Not publicly exposed.
- **Authentication and Sandbox/UAT:** Authorized API access.
- **Input:** Property / land identification details.
- **Data:** Ownership history, sale, gift, inheritance/mutation, pledge, release of pledge, acquisition, alienation, GPA, rights & liabilities.
- **API Access:** Through authorized stakeholder onboarding.
- **Coverage:** Participating State Revenue, Survey & Registration departments.
- **Production / Usage Pricing: Not publicly listed.** Pricing is governed by applicable state-government partnership frameworks and NIC institutional deployment terms.
- **Documentation:** NIC Property Chain Concept Paper.
- **Portal:** https://propertychain.nic.in/
- **API Platform:** https://www.nic.gov.in/service/napix/
- **Other Providers:** State Land Records / Registration Departments, NAPIX.

Parent Documents — Landeed

- **Provider:** Landeed
- **Purpose:** Retrieve historical/parent property documents for title-chain verification.
- **API:** Document Procurement API.
- **Integration and Method:** REST API / REST endpoints.
- **Endpoint:** Not publicly exposed — available through developer onboarding.
- **Authentication:** Not publicly documented — provided during API onboarding.
- **Sandbox:** Not publicly documented.
- **Input:** Survey number, village number, owner name, document number and related property documents.
- **Data:** Registered documents, EC, Patta, ROR, FMB, 7/12, Khata and other property documents.
- **Coverage:** 23+ Indian states.

- **API Access:** Developer onboarding required.
- **Production / Usage Pricing: Not publicly listed.** Developer/enterprise pricing is not published on the public API page.
- **Documentation:** https://www.landeed.com/document-procurement-api
- **Provider:** https://www.landeed.com/

Other Providers: State Registration Departments, State Land Records, NIC Property Chain

Commercial Credit — CRIF High Mark

- **Purpose:** Provide credit information and analytical solutions for businesses and financial institutions.
- **Provider:** CRIF Credit Information Services Pvt. Ltd. (formerly CRIF High Mark Credit Information Services Pvt. Ltd.).
- **Regulatory Status:** RBI-licensed credit bureau.
- **Data / Services:** Credit information and analytical solutions for banks, NBFCs, insurance companies and telecom service providers.
- **API Access / Endpoints:** Not publicly shown on the provided source.
- **Commercial/API Eligibility:** Requires institutional access and approval from CRIF.
- **Sandbox / Testing: Not publicly listed** — Test/sandbox access requirements are not specified.
- **Production / Live Usage: Paid** — Requires formal corporate/commercial agreement and applicable RBI-compliant member onboarding.
- **Docs / Website:** CRIF High Mark
- **Developer Portal:** https://developer.crif.com/
- **Other identified providers:** TransUnion CIBIL, Experian.

🟢 FREE APIS

Professional Profile Verification — LinkedIn

- **Purpose:** Verify LinkedIn member identity and professional/workplace verification status.
- **Provider:** LinkedIn
- **Integration:** REST API.
- **API and Methods:** LinkedIn API / GET.
- **Verification Endpoint:** https://api.linkedin.com/rest/verificationReport
- **Profile Endpoint:** https://api.linkedin.com/rest/identityMe
- **Authentication:** OAuth 2.0 with member consent.

- **Data:** Identity/workplace verification status and permitted LinkedIn profile information.
- **Sandbox / Development:** Development access available with limited access.
- **Coverage:** LinkedIn members who authorize the application.
- **Consent:** Required.
- **Production / Usage Pricing: Free** — LinkedIn does not list a per-call API fee for the Verified on LinkedIn API. Access is subject to eligibility, permissions and app review.
- **Docs:** https://learn.microsoft.com/en-us/linkedin/consumer/integrations/verified-on-linkedin/overview
- **API Reference:** https://learn.microsoft.com/en-us/linkedin/consumer/integrations/verified-on-linkedin/api-reference/verification-report
- **Developer Portal:** https://www.linkedin.com/developers/apps
- **Other identified providers:** Authorized professional-data providers.

Public Social Profiles — Meta

- **Purpose:** Access permitted social-profile information from Meta platforms for verification and background research.
- **Provider:** Meta
- **Integration:** Graph API / REST API.
- **API and Latest Version:** Meta Graph API / v26.0.
- **Authentication:** Access token / OAuth-based authorization.
- **Input:** Authorized user/account information and required API permissions.
- **Data:** Profile/account information permitted by the applicable Meta API and permissions.
- **Sandbox / Testing:** Development and testing tools available through Meta for Developers.
- **Coverage:** Facebook and supported Meta social technologies.
- **Production / Usage Pricing: Free** — Meta does not charge a separate per-call fee for Graph API access. Availability of specific data and permissions depends on the applicable API products, app review and platform policies.
- **Docs:** https://developers.facebook.com/docs/graph-api/
- **Developer Portal:** https://developers.facebook.com/
- **Other identified providers:** Platform-specific approved social APIs.

Instagram Professional Profiles — Instagram Platform

- **Purpose:** Access permitted information from Instagram Professional accounts for profile and business verification workflows.
- **Provider:** Meta / Instagram
- **Integration:** Instagram Platform APIs.
- **API Options:** Instagram API with Instagram Login and Instagram API with Facebook Login.
- **Account Type:** Instagram Business or Creator accounts.
- **Authentication:** OAuth-based user authorization/access tokens.
- **Data:** Permitted professional-account information, media, comments, mentions and insights depending on granted permissions.
- **Coverage:** Instagram Professional accounts connected/authorized to the application.
- **Sandbox / Testing:** Development and testing available through Meta for Developers.
- **Additional capabilities:** Messaging API, Webhooks, media publishing, comment management and insights.
- **Production / Usage Pricing: Free** — Meta does not list a separate per-call fee for the Instagram Platform APIs. Access is subject to permissions, eligibility, app review and platform policies.
- **Docs:** https://developers.facebook.com/docs/instagram-platform/
- **Developer Portal:** https://developers.facebook.com/
- **Other identified providers:** Other platform-approved social/profile-data providers.

Property Valuation / Guideline Value — LandLens

- **Provider:** Verified.RealEstate — LandLens
- **Purpose:** Retrieve the government guideline value / official registration rate for a property.
- **API:** LandLens API.
- **Tool:** guideline_value
- **Integration:** REST / HTTP API.
- **Method:** POST.
- **Endpoint:** https://verified.realestate/api/v1/tools/{guideline_value}
- **Authentication:** Bearer API Key — Authorization: Bearer llk_YOUR_KEY or OAuth 2.1 access token.
- **Sandbox:** No separate sandbox documented.
